#### Section A - Reading (5 Marks)

# Read the passage given below and choose the correct answer for the questions that follow: 1x5=5

Hundreds of years ago, there was a king who had a very special grinding mill made of stone. It looked like a normal mill but it had special powers. All one had to do was request what one wanted while turning the mill. Out would come whatever was requested. If rice was requested, rice would come out. The king could even request the grinding mill for gold, and it would perform his command.

One day, a thief stole the mill from the palace and tried to escape to his country by boat. Safely, in the boat, the thief tried to think about what to ask the mill for. He decided on salt, something that everyone had a use for. "Make salt," he commanded the mill. The mill started churning out salt. Soon salt was spilling from the sides of the boat, but the thief did not notice this as he was dreaming about how wealthy he would be. Finally, the boat was so full that it sank to the bottom of the sea. And since nobody told it to stop, it is still turning and making the oceans of the world salty.

- 1. What special power did the grinding stone have?
- 2. Why did the thief take a boat?
- 3. Why did the thief decide to ask for salt?
- 4. What was the thief doing when the mill was making salt?
- 5. Choose a word from the passage which means the same as:
- a. asked for (para 1)
