Time:1hr

General Instructions

This paper contains three sections

Section A – Reading-5 marks

Section B – Writing & Grammar- 10Marks

Section C- Literature-15Marks

All Sections are compulsory

Section A – Reading (5 Marks)

Read the passage given below and answer the questions that follow them:

I) What writers struggle to express through numerous newspaper columns, the cartoon manages in a pointed one-liner. Little wonder then, that the first thing most of us like to see when we pick up a newspaper is the cartoon. Simple though it may seem, making a cartoon is an art that requires a combination of hard work, training and a good sense of humour.

II) Cartoonists say that the cartoons that make us laugh the most are in fact the cartoons that are hardest to make. Even celebrated cartoonists like R.K. Laxman admit that making a cartoon is not a piece of cake. Laxman says he has to wait for over six hours, which includes spending a lot of time scanning newspapers and television channels before any idea strikes him.

III) So how does one become a cartoonist? Which of us has the talent to make it? How can we master the rib-tickling strokes and the witty one-liners? There are few colleges or schools for cartoonists. Most cartoonists come from art colleges, while some learn the craft on their own. Most established cartoonists are of the view that no institute can teach you to make a cartoon.

IV) "You can pick up the craft, you may learn to sketch and draw in institutes, but no one can teach anyone how to make a good cartoon", says Uday Shanker, a cartoonist with Navbharat Times. While basics, like drawing and sketching can be learnt in an art college, and are important skills, these alone, do not make a good cartoonist. Because it's a question of one's creativity and sense of humour; two qualities one simply may not have. The advice established cartoonists give is that just because you can sketch, don't take it for granted that you will become a cartoonist.

- What, according to Laxman, is the challenge in creating a good cartoon? **(1x5=5M)**
- What qualities does making of a cartoon require?
- What advice do cartoonists give?
- The cartoon conveys in a line what _____
- Find the synonym of: amusing (para-3)

Section - E consists of one case study question carrying 1+1+2=4 marks

Section A

6x1=6

I Choose the correct answer

1. Which of the following cannot be a rational number?

a. $\frac{0}{5}$

b. $\frac{0}{-5}$

c. $\frac{5}{0}$

d. -1

2. What should be added to $(\frac{-5}{9})$ to get 1?

a. $\frac{4}{9}$

b. $\frac{-4}{9}$

c. $\frac{14}{9}$

d. $\frac{-14}{9}$

3. The circumference of a circle is 44cm. Its area is _____.

a. 308cm^2

b. 154cm^2

c. 77cm^2

d. 616cm^2

4. Two sides of a right triangle are 1cm each. The area of the triangle is _____.

a. $\frac{1}{2}\text{cm}^2$

b. 1cm^2

c. 2cm^2

d. 4cm^2

5. The coefficient of 'a' in $-4a^2b$ is _____.

a. -4

b. $-4b$

c. $-4ab$

d. a^2b

6. Assertion: The expression $a+b+c$ is a trinomial.

Reason: In $a+b+c$, there are three variable a, b, c

a) both assertion and reason are correct and reason is correct explanation for assertion.

b) both assertion and reason are correct but reason is correct explanation for assertion.

c) assertion is correct but reason is false.

d) both assertion and reason are false.

Section B

3x2=6

II Do as directed

- The base of a parallelogram measures 1m and its height is 75cm. Find its area in square meters.
- Compare $\frac{3}{7}$ and $\frac{5}{8}$ using $>$ or $<$ sign.
- Show the terms and factors by factor tree method $-5a^2b + 7abc^2$

Section C

3x3=9

III Solve the following

- Find the sum of $\frac{5}{7} + \frac{-11}{14} + \frac{16}{21}$
- A wire is looped in the form of a circle of radius 28cm. It is rebent into a square form. Determine the length of the side of the square.
- Simplify the expression and find its value for $a = 5$ and $b = -3$
 $3(a^2 + 2ab) + 3b - ab$

Section D

1x5=5

- A paper is in the form of a rectangle ABCD in which $AB=21$ cm and $AD=14$ cm. A semicircular portion with BC as diameter is cut off. Find the area of the remaining part.
